4 Ways to  
Usher Your  
Business  
Into the  
Future with  
Technology

In today's high-speed business landscape, companies need to do whatever it takes to stay competitive.

**That starts with technology.**

The stark reality is that sometimes, you're only as good as your tech will allow you to be.

With Microsoft 365 establishing itself as the undisputed champion of modern, collaborative business tools, BizTech Fusion is the reliable choice for workplace modernization and the perfect IT partner to fill skills gaps.

Here are **FOUR WAYS** we can usher your business into the future:

- 1 Work from anywhere
- 2 Switch modalities with ease
- 3 Economize hardware
- 4 Cybersecurity

# 1 Work From Anywhere

## **Ditch the webcams and desktop phones and take your meetings anywhere from any device.**

Collaborating and meeting with colleagues and clients can be done at the touch of a button, saving time in setting up and conducting meetings. This flexibility drastically also reduces on-site and travel-related costs as well.

When it comes to collaboration outside of meetings, Microsoft 365 cuts out the old way of emailing the same documents back and forth until completion. With cloud-based storage, data and documents can be securely accessed by any user from any device, and discussion threads make remote collaboration a breeze.

overnight trips replaced with online meetings on average <sup>1</sup>

## 2 Switch Modalities With Ease

### **Meetings don't stop just because you're traveling for work.**

On days that are complicated by travel, you can start your day at your desktop, switch to your mobile device mid-meeting while you take the dog for a walk or take a call in a taxi while you head to

the airport. With seamless transitions from desktop to surface to mobile device, you'll never find yourself tied to a desk.

# 3 Economize Hardware

**Microsoft Voice** is the modern business phone solution to simplify voice communications and save money. In addition to Microsoft Teams, Voice will reduce your TCO<sup>2</sup> for your phone systems and eliminate the need for expensive desktop phones that can cost up to \$500<sup>3</sup>. Moving from a POTS or PBX to a modern VoIP solution also eliminates long distance and international calling charges.

Having an integrated voice service eliminates hardware and saves time and money <sup>2</sup>

132%  
ROI for enterprises and

185%  
for SMB

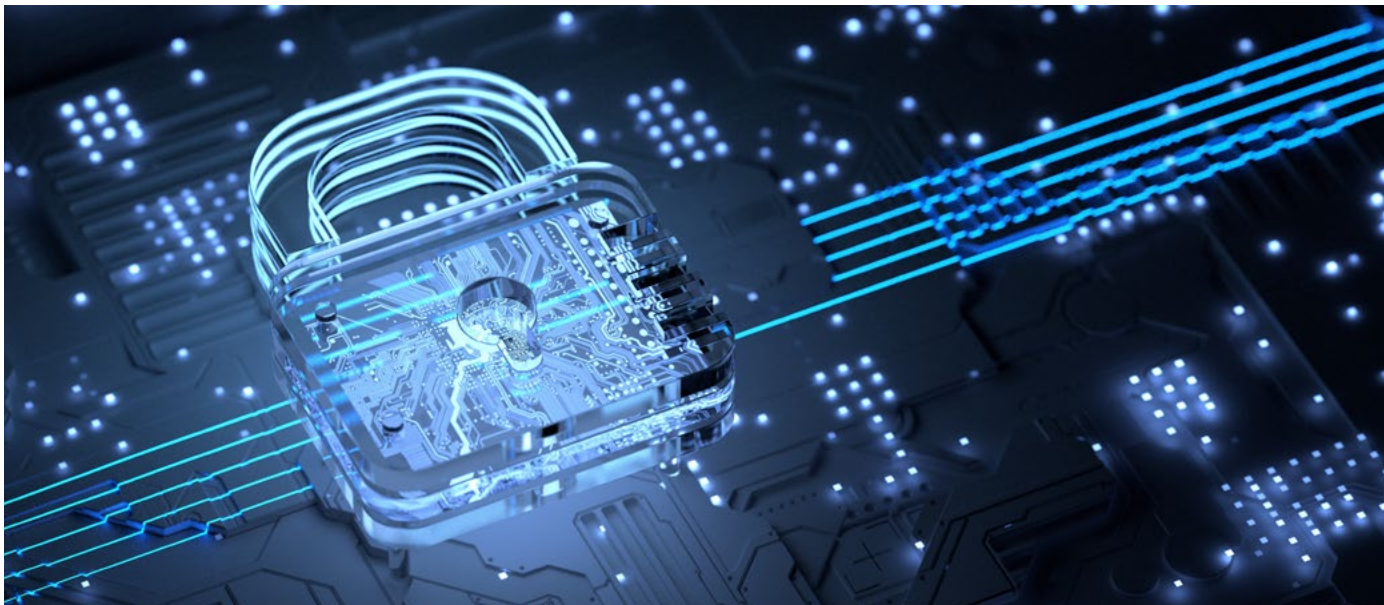

# 4 Cybersecurity

**The new threat landscape is vastly different than it was just five years ago. What used to be safe sitting behind a firewall is now susceptible to ever-evolving threats.**

Leveraging the defensive capabilities of Microsoft Defender and Azure Sentinel will allow you to continually improve your security posture. Plus, Teams enforces team-wide and organization-wide two-factor authentication and single sign-on through Active Directory for added protection.

And in the event of a mobile device being lost or stolen, Microsoft Intune allows you to control those devices remotely.

# BizTech Fusion is a technology partner you can trust.

With tested knowledge and failsafe reliability, our clients know that we are here to help you take your business into the modern world. We tailor our proven methodology to every project and are your go-to Microsoft experts for the most complex, technical requirements and needs.

## About BizTech Fusion

BizTech Fusion is a needs-focused IT engineering firm that delivers high-quality solutions and services to our clients time and time again. Our commitment to exceeding our customer's expectations by providing first-rate services is what keeps our feet moving.

BizTech Fusion is proud to be a minority-owned business and is one of only 12 Microsoft partners selected for the Black Partner Growth Initiative.

## Why Choose BizTech Fusion?

- ✓ IT that is finely tuned to aid the success of your business is no longer optional. It's a requirement.
- ✓ Companies who don't invest in bulletproofing their information processing will fall behind their competition. Modern organizations need a trusted partner to help them fill skills gaps, drive innovation, and maximize their technology investments.
- ✓ BizTech Fusion is that partner. We create and maintain an effective, business-driven, optimized infrastructure that will free up your internal experts to focus on mission-critical tasks, all at a budget-friendly price.
